

# Join the new Risk Management Section!

Risk Management is a fast evolving discipline within insurers, other financial institutions and any enterprise faced with the evaluation of multifaceted risks. Actuaries by their training are well suited to serving the professional needs of companies in the identification, quantification, assessment and management of risk.

The new Risk Management Section will promote education, research, networking and job opportunities in this important area. We plan to offer seminars, publish a newsletter and promote further research. The proposed Section will cross all practice areas, life, finance, health and retirement systems. The Section will develop resources for all actuaries not only in traditional fields but also in non-traditional and specialized fields such as banking. **Join now!**

Yes! I'd like to become a member of the Risk Management Section of the Society of Actuaries! Section dues applicable to calendar year 2003 are \$20 payable in conjunction with this membership submission. I have indicated below my method of payment.
